

Data Search & Retrieval for REACH Registration

Half day interactive workshop

REACH registration requires a vast amount of data to be collected, managed and input to the dossier. Data acquisition can be a time consuming and costly activity. This interactive workshop will give delegates the opportunity to discuss the major issues and learn the most effective ways to search and retrieve the necessary data for REACH registration.

Who should attend?

This course is a must for anyone who will be potentially registering substances under REACH. Downstream users of chemicals and companies looking to sell data to SIEFs will also find the course useful. Individuals and teams responsible for working on REACH / regulatory compliance will benefit from the knowledge and experience provided by our expert course presenter.

Main topics include:

- Data requirements for REACH
- Overview of chargeable and free web-based information resources
- Basic substance information (CAS Registry Numbers, synonyms etc) and how to use this to search
- Sources and searching for:
 - Physico-chemical data
 - Toxicology data
 - Eco-toxicology data
- Assessing references, accessing full text and handling data
- Monitoring the literature

By the end of the course, participants will have developed an awareness of:

- A broad range of information sources that can be used to acquire data for REACH registration
- The key principles involved in the construction of an effective strategy for database searching
- The relative merits of the various approaches to data acquisition

Cost: £145+VAT per person including lunch.

Dates: Wed 25th October 2009 or Thursday 25th February 2010. 9.30am— 1pm.

Venue: Lancaster Environment Centre, Lancaster University
