

REACH compliance obligations for downstream users - all you need to know

UPDATED FOR 2010: 1/2 day interactive workshop

REACH affects all organisations that use chemicals and these companies have specific compliance responsibilities which need to be understood and managed. Downstream users include; formulators, article producers, end users, distributors and engineering firms amongst others.

This course provides an opportunity to understand your obligations and discuss / share experiences with other delegates and one of The REACH Centre's senior consultants. You will understand the implications of REACH and be able to effectively communicate and share the correct information with your suppliers and customers.

Topics:

- Overview of the main features of REACH
- Understanding the role of users in REACH
- Identifying chemical uses
- Regulatory obligations under REACH
- Supply chain communication – up and down stream
- SVHC (Substances of Very High Concern) and Candidate List responsibilities
- Commercial considerations
- Registration numbers
- CSA and exposure scenarios
- Risk management and auditing
- Authorisation / restrictions
- User obligations and options
- Impact of the new CLP (Classification, Labelling and Packaging) regulation

"After attending this course I'm far more confident of meeting our REACH obligations. The facilities were superb and the knowledge of the presenter was excellent."

Cost: £145+VAT per person

Date: Wednesday 21st July, .Wednesday 8th September 2010 9.30am — 1.30pm.
