

IUCLID5 for SIEF members

1 day interactive workshop

The day focuses on hands-on experience in applying IUCLID5 in line with REACH.

IUCLID5 (International Uniform Chemical Information Database) is the official tool for data collection in relation to REACH and is essential for those looking to successfully register in line with REACH. The workshop will cover all the main aspects of IUCLID5 and give you the chance to become familiar with the software and how it can be used most effectively.

The workshop is delivered by experienced IUCLID5 trainers. It is limited to 10 participants to provide the optimum interactive experience.

Topics:

- Getting started
- Legal Entities, EC Inventory, Reference Substance, Substance Creation
- How to navigate, search, add, modify data and produce outputs
- How to report identified uses
- Dossier creation and maintenance
- Templates and categories
- Data sharing
- Case studies
- Coverage of the new version of IUCLID (5.2)

“Great course that opened my eyes to a complex system. It was very useful getting hands on experience and being guided through the system by confident presenters.”

Cost: £445+VAT per person

Date: Tuesday 29th June 2010. 9.30am—4pm.

Venue: Lancaster Environment Centre, Lancaster University
