

Managing REACH: practical help for potential registrants

UPDATED FOR 2010: 1 day interactive workshop

If you are preparing to register chemical substances under REACH this workshop examines the timeline for registration and the planning steps you need to take along the way.

The workshop will introduce the registration process and address hot topics such as SIEF management and communication, supply chain management and the ongoing responsibilities of REACH registrants. The REACH Centre has a wealth of expertise of working in SIEFs and managing the REACH registration process on behalf of our clients. After the course delegates will leave having learnt both from the experiences of each other and our highly experienced expert presenter.

Topics:

- What needs to be registered – exemptions, Annex V, polymers / monomers, intermediates
- Timing into registration process
- Registration process – inquiry, dossier requirements and preparation
- Substance identity and ‘sameness’
- Supply chain and safety data sheets
- Annex VII – X requirements
- Data Waiving
- Data Evaluation
- CSA/R requirements
- SIEF formation
- SIEF management process – do’s and don’ts
- Cost sharing requirements
- Ongoing registrant responsibilities

“The presentation was very professional, on a par with anything I have been to in the last 30 years in the chemical industry.”

Cost: £295+VAT per person

Date: Thursday 15th April, Tuesday 8th June 2010. 9.30am—4pm. Lunch included.

Venue: Lancaster Environment Centre, Lancaster University
