

# Safety Data Sheet (SDS) Services

Meeting requirements, reassuring your customers.

Compliant Safety Data Sheets are an essential part of your business, in Europe and beyond. Accurate and up-to-date full SDS and concise eSDS are an important part of your product package.

Strong data in a clear format can give you a competitive edge.

Customers are becoming more and more aware of their responsibilities and of the regulatory requirements so give them all the information that they need in a useful form and they'll be reassured.

We use and draft SDS documents almost every working day.

That broad experience of SDS and eSDS creation can help you to meet not only your regulatory requirements, but also your market needs.

Our services include:

- Assessing your current documentation for compliance – with advice on the priorities for action
- Conversion of your existing SDS into compliant documents for EU and non-EU markets
- Conversion of EU documents into local SDS formats for other global markets – including language translation services
- Desk research to find the appropriate studies and data to fill any gaps in your information
- Update your existing documents, anticipating CLP/DSD/DPD and classification changes
- Drafting of new SDS or eSDS (or both) for substances, intermediates and mixtures – enabling formulators, distributors and importers to have confidence in the data as well as manufacturers and final customers
- Editing and branding of these key documents to fit your house style.

Our experience can have a big impact on your safety information and data sheets:

- Get them right and they will reassure your distribution partners and customers
- Use our expertise and you can save time and money.

Whatever the SDS task you're facing – and however urgent - get in touch and find out what our team could do for you and for your business.
