

Working effectively in SIEFs & Consortia

Your chance to find out about the latest thinking on SIEF communication, consortia and registration

The Centre for Chemicals Management is hosting another in its series of successful REACH workshops on SIEFs and Consortia. The workshop combines excellent quality content and an interactive focus with expert delivery from legal and chemical industry practitioners involved in SIEF leadership.

The workshop provides an in-depth exploration of the legal responsibilities and the practical issues involved in the management of your SIEF and consortia activities. Breakout sessions allow you to discuss and debate different scenarios and your own experiences of being part of a SIEF. These discussions will enable you to gain insight into differing viewpoints.

Course benefits:

- Participants will have a deeper understanding of consortia and consortia agreements
- Participants will exchange ideas and real experiences with other delegates and presenters
- Participants will be able to Identify strategies to achieve goals in SIEFs
- Participants will benefit from delivery by world-leading experts and enjoy a detailed insight into all the latest SIEF & consortia activity

"The knowledge and views of the presenters and other delegates reinforced the quality of the course material and enabled an excellent forum for discussion and sharing of common experiences.."

Who should attend?

Anyone responsible for REACH within their company may be taking an active part in SIEFs. In order to achieve your goals in the SIEFs you must understand the issues you will face and the possible financial, marketing and legal implications.

"The shared experiences of the presenters and delegates during discussion periods is a great asset and provides excellent value for money..."

Cost: £375 per person

Date: Wednesday 6th May 2009
